

Track, Analyze & Improve Fleet Operations

All-in-one fleet management software

KeepTruckin Integration

Seamlessly integrate your KeepTruckin devices with Fleetio.

Resolve failed inspection items with maintenance workflows

Automatically create issues from failed inspection items from your KeepTruckin DVIRs. Quickly assign service work for a speedy repair and resolution.

Manage Diagnostic Trouble Codes (DTC) & engine faults.

Don't rely on drivers to tell you if their "check engine" light is on! Get an email notification when new fault codes are detected by your KeepTruckin devices, and create an Issue in Fleetio from a fault code with one click (or choose to ignore it).

Get automatic odometer readings

Odometer readings automatically sync every day at midnight (in your account's time zone), or you can use the one-click option to manually trigger a sync at any time. The days of retrieving odometer readings from drivers and loading them into Fleetio are over!

Report on fuel location exceptions.

Ever been suspicious of fuel theft? Now fuel card transactions are automatically compared against actual vehicle locations, and geolocation differences exceeding a certain threshold are flagged. Get a daily email summary and detailed map visualization of the occurrence.

See your current vehicle location in Fleetio.

Easily see a vehicle's current location, driving status and more right on the vehicle profile page in the Fleetio user interface.

KeepTruckin Integration Setup

Setting up the KeepTruckin integration is simple.

Step 1

Admin Users can log in to their Fleetio account and select Vehicles > GPS Integrations from the menu on the left to add their KeepTruckin credentials.

Step 2

All KeepTruckin devices are then listed and can be mapped to the appropriate vehicles in Fleetio.
